OGDEN, June 25—There is some danger that the efforts of the city council to create a paving district on Washington avenue between Ogden river bridge and Twenty-second street will be delayed by abutting property owners, who are protosting against the proposed improvement. City Engineer Bostaph has not completed his computation, but it is believed that there are enough protestants already to defeat the paving of the northern block. A report will be submitted to the city council tomorrow night by the city engineer.

BEATING THE POSTOFFICE: HOW THE HOBOS DO IT

Special to The Tribunc.

Special to The Tribune.

MODENA, June 26.—With the resumption of through trains on the San Pedro, the hobo is again in evidence. The first one to arrive at Modena today revealed a scheme by which the United States mails may be worked without paying the postage. According to this disciple of seeing America, Speedy Jim and Lingering Peter meet in Philadelphia, for instance, and decide on their itinerary. Say they select Chicago as the first postoffice of prime importance. Speedy Jim beats there via Pittsburg and Lingering Peter via Buffalo, N. Y. The first one to arrive in Chicago and size matters up, whatever the object drops a letter to the other in the postoffice there, without a stamp being affixed. The postoffice duly drops a notification card to the one addressed, stating that a letter to his addressed, stating that a letter to his addressed, stating that a letter to his addressed in the seed, that Chicago is "punk," "on the blink," etc., and Speedy Jim is still moving westward.

Fete, to let Jim know that he is on the caboose end of things, drops an unstamped letter addressed to him at the next mail point of their selection, which may be Kansas City, Denver, Omaha or Salt Lake City. Speedy Jim reaching one of these points first, receives the nortification card through the general delivery of the postoffice, and so knows that Lingering Fote is flagging along behind.

Should by some chance Pete forge ahead, the next card received by Jim will notify him that there is a paper to his address being held, which will be forwarded upon receipt of the required poatage. But suppose either finds a good opening for such craftsmen as they may happon to be—laving brick, cracking a safe—or to signify that a certain place is a sure haven of rest and grub, without labor, the next card notifies the addresse chart a parcel is being held.

Now the letter may be simply an addresse contain anything from discarded underwear to rejected socks.

In the language of this type of the wanderlust, "Can you beat it?"

IN WEISER LAND CASE

Special to The Tribune.

BOISE, June 28.—After an all night sees long the jury in the case of the Weisser Land and Water company against Col. W. Ryan and Frank D. Ryan, returned a verdict for \$16,000 in favor of the defendants, to be equally divided between them, the case being tried before Judge Dietrich of the federal court. The defendants claimed that their land in the Lost valley. Washington county, had been selected as the site for the reservoir of the Weiser Land and Water company and the defense tield to show that the land was worth \$40,000. They contended that the construction of the dam at the head of the valley would back water onto about \$50 acres and ruin it for agricultural purposes. The court, lowever, conceded the right of the cempany to build the dam, since it was to be used in the reclamation of hundreds of acres of land on the benches, and fixed \$16,000 as the proper price of the land in question.
